Safety Information

Save these instructions. This Safety Information contains important instructions that should be followed during installation and maintenance of the Schneider Electric equipment.
It is intended for Schneider Electric customers who set up, install, relocate, or maintain Schneider Electric equipment. .

⚠ ⚠ DANGER

HAZARD OF ELECTRIC SHOCK, EXPLOSION, OR ARC FLASH

- The powershelf is intended to be installed and operated by a skilled person in a controlled location with restricted access.
- Install the powershelf horizontally in a suitable IT rack.
- The powershelf is intended only to supply power to appropriate IT datacenter loads.
- Ensure all power cords are fully engaged with the powershelf inlets.
- Do not contact with conductive materials carrying high current.
- Refer all servicing to qualified personnel. There are no user-serviceable parts inside.
- Use indoors only in a dry location.

Failure to follow these instructions will result in death or serious injury.

⚠ WARNING

RISK OF FIRE HAZARD

- Connect this equipment to an outlet with the same voltage rating as the powershelf.
- Make sure the utility power outlet for the powershelf will be close to the powershelf and readily accessible. The power cord connect the powershelf to utility power.

Failure to follow these instructions can result in death or serious injury.

NOTICE

HAZARD OF EQUIPMENT DAMAGE

- Make sure that the input power cords are properly secured to the powershelf.
- Ensure that the locking mechanism is fully engaged.This mechanism is crucial for preventing accidental disconnects and maintaining a stable power supply.
- Ensure the ambient temperature does not exceed the rated ambient operating temperature for the powershelf.

Failure to follow these instructions can result in equipment damage.

- Follow all local and national codes when installing the powershelf.
- Connect the powershelf power cord to the utility power outlet after the powershelf is properly mounted to the rack enclosure and all load and signal connections are made.
- Make sure the utility power outlet and the powershelf power cord and plug are in good condition.
- Do not work alone or under hazardous conditions.
