Fe-Co (J)

VJ44330000

Sensor for temperature detection. Designed for fast response and built to ensure high reliability and durability. Transmitted signal: mV

General features

- Terminal: sensor in AISI 304 stainless steel capsule
- Stranded glass-fibre insulated flexible conductors, glass-fibre filler and tinned copper braid outer jacket
- The cable outlet from the capsule is protected by a stainless steel spring.
- To extend the probe cable, use a compensated cable with min. 0.35 mm² cross-section
- Hot junction connected to external sheath (shorter response time to temperature variations)
- 2-wire thermocouple

Technical specifications

Measure	
Accuracy	Class 2 (IEC 584)
Functional characteristics	
Sensor type	Thermocouple
Sensor working range	-50 ÷ 400 °C
Working range sensor + cable	0 ÷ 400 °C
Mechanical features	
Protection degree	IP40
Physical features	
Cable type	Flexible conductors insulated with braided fiberglass Glass fiber filler and external reinforcement with tinned copper braid
Diameter dimension	
Dimension Ø - A	6 mm
Dimensions	
Probe length	100 mm
Cable length	3 m
